

Artificial Grass 110-BL

110-BL is designed in an olive shape and is made of polyethylene monofilament fibers. It is smooth and soft, yet more durable than common fibers. The introduction of UV stabilizers helps the fibers maintain their colour longer. 110-BL has become the most popular sports product in our portfolio. 2.5 million square meters of 110-BL grass has been installed in more than 40 countries during the last few years; the total volume equals 350 full-size fields
